

ACP Local Labor Market Trends and Opportunities

The ACP process requires an analysis of local, regional, and state labor market needs and the educational and training requirements for occupations that will fill those needs. Labor market trends assist students in accessing accurate national, regional, and state labor market information, including labor market supply and demand and its relevance to job outlook and availability. The trends in the labor market in Southeastern Wisconsin, specifically in Racine and Walworth counties, are available by clicking on the corresponding profiles below.

Racine County
