Policy Title ...USE OF SCHOOL SHOPS AND LABORATORIES

Code No. 836

The Board assumes no personal or material liability for the use of school shops and/or laboratories by individuals who are not certified to instruct or function in those areas of concern.

Individuals may apply for special permission from the building administrator who must be satisfied that the individual possesses sufficient skills and knowledge so that it is reasonable to assume no personal or material liability will result from the granting of the request.

When in doubt it is suggested that the use place in writing a waiver which releases the district, staff, and building administrator from any relief sought through legal means in the event of personal or material injury suffered by the user. This does not release the user from any expense the district may incur in consequence of the use of such shop or lab facility.
