

Navigating this Table

These are the neighborhoods from the map

These are the consultant's projected number of "traditional" 4K-5 students on "opening day"

We have learned that many elementary school students do not actually attend the school that the 2011 attendance area map suggests they might. These two columns show the most and 2nd most commonly attended elementary school in April 2020, not including Montessori students.

Neighborhood ¹	Grade 4K-5 Non-Montessori Enrollment in BASD Schools ²		2019-20 Assigned Elementary Attendance Area ³	Most Common Elementary School Actually Attended ⁴		% Attending Assigned Elementary School ⁵
	Actual, April 2020	Projected, September 2021		First	Second ⁵	
16	17	15	Cooper	Waller	Cooper	23%
17	16	15	Cooper	Waller	Cooper	8%
18	7	6	Cooper	Waller	Cooper	43%

These are the number of April 2020 4K-5 students in the neighborhood that attend "traditional" programming in one of the BASD's schools

This is the current elementary attendance area first assigned to the neighborhood on a 2011 District map. Colors match those on map.

This last column shows the percentage of students who attend the school one might expect when viewing the attendance area map, not including Montessori.

NOTES:

¹ Neighborhoods are per a map prepared by MDROffers Consulting on 4/7/20 to aid in attendance area process.

² Actual and projected grade 4K-5 enrollment excludes (a) ~180 Montessori students in these grades, who will be assigned to the Dyer building beginning in Sept. 2021 and (b) ~30 4K students attending 4K at private community partner sites. 5th graders currently attend Dyer; 5th graders will be reassigned to elementary schools in Sept. 2021.

³ From BASD attendance area map first published in January 2011, also reproduced on MDROffers' 4/7/20 map. Cell colors in this column and in the two following two columns correspond with colors on that map.

⁴ From April 2020, not including Montessori students, 5th graders, or 4K students at private community partner sites.

⁵ If the same number of students attended two schools, the cell includes both school names and a blended color..

⁶ Equals the number of grade 4K-4 non-Montessori, non-private partner 4K students attending the school that would be anticipated by the 2019-20 assigned (mapped) elementary attendance area for the neighborhood, divided by the total number of 4K-4 non-Montessori, non-private partner 4K students in that same neighborhood, as of April 2020.
