## Skill：Patterns and Predictions

## Complete each table．

1. 

| Time（h） | 1 | 2 | 3 | 4 | 7 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Distance <br> cycled（mi） | 8 | 16 | 24 | 32 |  |

2. 

| Time（min） | 1 | 2 | 3 | 4 | 7 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Distance from <br> surface of water（yd） | -3 | -2 | -1 | 0 |  |

For Exercises 3－4，find the values of the missing entries in each table．
3.

| $\boldsymbol{m}$ | 4 | 6 |  | 10 |
| :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{n}$ | 24 | 26 | 28 |  |

4. 

| $\boldsymbol{p}$ |  | 6 | 10 | 14 |
| :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{q}$ | 1 | 13 | 25 |  |

5．A pattern of squares is shown．

## 由曲且

a．Sketch the 4th and 5th figure in this pattern．
b．Make a table comparing the figure number to the number of squares． Write an expression for the number of squares in the $n$th figure．
$\qquad$ Date $\qquad$ Class $\qquad$

Make a table for each function. Then graph the function. Show only the portion that makes sense for each situation.
6. On a trip Alex averages $300 \mathrm{mi} /$ day.

The distance $d$ he covers is a function of the number of days $n$.

| $\boldsymbol{n}$ |  |  |  |  |
| :---: | :--- | :--- | :--- | :--- |
| $\boldsymbol{d}$ |  |  |  |  |

8. Suppose you have $\$ 50$. The amount of money you spend $s$ decreases the amount you have left $a$.

| $\boldsymbol{S}$ |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| $\boldsymbol{a}$ |  |  |  |  |

7. Suppose you earn $\$ 7$ per hour. The number of hours you work $n$ determines your pay $p$.

| $\boldsymbol{n}$ |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| $\boldsymbol{p}$ |  |  |  |  |

9. You have $\$ 10.00$. Each week you save $\$ 2.50$. The number of weeks you save $w$ increases your savings $s$.

| $\boldsymbol{w}$ |  |  |  |  |
| :---: | :--- | :--- | :--- | :--- |
| $\boldsymbol{s}$ |  |  |  |  |
